We need: - courageous truth-telling

Not just privately
"to power"

speak truth to the world

Though it's safer to speak truth - which
power doesn't like to hear - to power
is private (Pamell, McN ...)

BUT

and can be effective (in particular cases,
more effective)

- courageous non-violence

for justice, freedom

Constitution, civil liberties

- courageous anti-~~violence~~ ^{unorganized} ~~unorganized~~ ^{organized} ~~unorganized~~ ^{organized}

involvement of support, participation, defense,
silence, legitimization, rationalization

and when it is popular,

Address to Obama Nuclear Policy Review members

Criticize existing articles and books, on delegation, SIOP; correct them; point out limitations imposed on public discussion by secrecy

Congress: point out Sen. Kerrey inability to get targeting briefing

Eden: What difference does it make to introduce firestorms, fire, into damage calculations?

(Does it wipe out "limited nuclear options"? Erase the distinction between counterforce and urban-industrial targeting?)

Scott Sagan and Blair on accidental war, false alarms, unauthorized actions

Address Soviet/Russian scientists; former and current.
